Inspired by nature. Improved by science.

At Timberline, we've spent decades perfecting the science of reptile nutrition. Our innovative Vita-Bug® worms and crickets are packed with vitamins and nutrients without the need for additives. And when you're ready to order, our Feederologists can help you find the perfect live foods to balance any pet's diet. It's just another way we improve the lives of pets – and the people who care for them.

Timberline
Nature. Nurture. Nutrition.
